## Quality Manager

*Can you manage and develop quality assurance across a fast-growing company?*

Lithium Balance develops Li-ion battery management systems (BMS) to control and monitor the increasingly powerful and complex batteries of the future green energy sector.

We are growing rapidly and need several new key employees to develop and produce new generations of battery management systems for batteries in cars, trains, motorcycles, and energy storage systems. To ensure consistent quality in these emerging high-volume applications, Lithium Balance is establishing a new position as Quality Manager.

### The job will include

- Continually developing and maintaining the company's existing ISO9001 system to support rapid growth
- Aligning quality processes in Lithium Balance towards automotive standards (eg. IATF16949, APQP) and with the overall QMS in Sensata (Lithium Balance was acquired by Sensata in January 2021)
- Performing regular internal audits within Manufacturing, Sales, R&D and Management, and ensuring adherence to quality processes across all departments in Lithium Balance
- Driving resolution of non-conformities and CAPAs
- Training management
- Maintaining Quality KPIs
- Leading monthly QA meetings
- Acting as the main point of contact on all quality matters, internally and externally

As our new QA manager, you will report to the COO, Karsten Gotved. You will be working closely with all departments in the company and with relevant stakeholders within Sensata in Europe, US and Asia. Lithium Balance is located in Smørum near Copenhagen.

### Qualifications

The ideal applicant will have most of the qualifications below:

- At least 5 years of relevant experience, preferably in both QA and production/R&D within the electronics industry
- A technical education, as engineer or similar
- Excellent communication skills and a hands-on, can-do approach to quality
- Strong project management skills and ambitions to shape the company culture across departments
- Experience with both small and large companies will be an advantage, as Lithium Balance is in transition from a start-up company to being a part of a large, global company

### We offer

WE MAKE BATTERIES WORK

*LiTHIUM BALANCE A/S was founded in 2006 with the specific purpose of develop and produce efficient Battery Management System's for Li-ION batteries. Our vision is to reduce emissions by simplifying battery based transportation and energy storage.*

- 
- A unique work environment with 60 enthusiastic entrepreneurs in a very fast-growing international company
  - An opportunity to apply both a strategical mindset, directing the future QA management at Lithium Balance, and a hands-on, practical focus to ensure quality product development and manufacturing
  - A strong sense of urgency and a good deal of humor
  - Salary according to qualifications
